With 3M™ Clarity™ Advanced Clear Braces

3M™ Clarity™ Advanced Clear Braces give you many reasons to smile.

Designed with your comfort in mind.

Clarity Advanced clear braces have one of the lowest profiles in the industry for a more comfortable fit. The braces are small and smooth, with rounded corners to reduce rubbing and irritation.

Convenient and easy to care for.

No trays to keep track of or excessive maintenance beyond normal brushing and flossing.

Virtually unnoticeable.

Translucent braces are designed to blend in with the natural color of your teeth and resist staining and discoloration throughout treatment.

Always in and always working.

Unlike clear aligners which must be removed for eating and drinking*, Clarity Advanced clear braces stay in place so your treatment's always advancing.

*Except water
